AVVISO DI SEMINARIO

Venerdì, 19 dicembre 2014, ore 15.00

Sala Garisenda – INFN-CNAF

Via Ranzani, 13/2, Bologna

Lorenzo Dini (Google)

Building Software at Google Scale

Abstract. More than 15,000 engineers from 100+ offices across the planet perform 35,000 commits each workday on a 1-billion-file codebase, producing 2 PB of build outputs daily.

This talk uncovers some of the technologies and practices behind the Google software life-cycle. We will talk about how Googlers change, build, test, review and submit their code.
